MEET THE INSPIRE PC

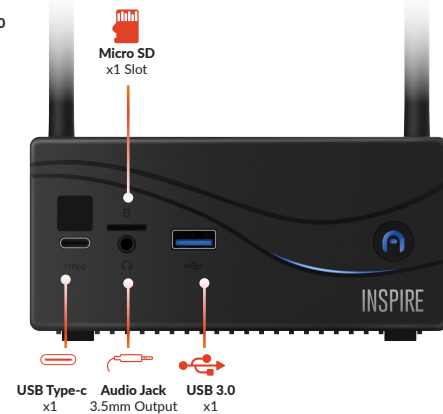

Azulle developed the high-velocity Inspire to be used by graphics designers, gamers, video producers, and business professionals. Whether running the latest high-resolution games, rendering in real-time for 3D printing, previewing scenes of life-like high-impact CGI movies, or performing business intelligence analysis on big-data sets, the compact Inspire is truly a muscular centerpiece of any computing platform.

“Computing at the Speed of Inspiration”

The Inspire's powerful architecture allows it to stream 4K video reliably.

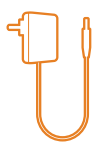

Transfer your data at high speed with USB Type-C or USB 3.0.

WHAT'S INCLUDED?

INSPIRE

POWER ADAPTOR
12V/1A

QUICK GUIDE

I.R REMOTE
